

## Project Overview

As of March 20, 2012

## Street Resurfacing 2011 Program – Project 4

**Description and Benefits:** Street resurfacing improves ride quality, reduces street maintenance expenses and serves as a means of renewing and prolonging the life of roads and highways. The work consists of milling the existing pavement, overlaying with new asphalt and replacing curbs and sidewalks, only as necessary, in order to accommodate new *Americans with Disabilities Act*-compliant curb ramps. Plans call for partial depth pavement repair only as needed.

Fifty-five percent of typical project costs go toward resurfacing, partial/full depth pavement repairs and curb repairs; 35% for curb ramps and 10% for construction inspection.

### **Schedule:**

Construction and inspections

### **Start**

spring 2012

### **Completion**

spring 2012

### **Status:**

Construction in progress.

### **Contact Information:**

Construction Project Manager: Paul Chilton, P.E., tel. (614) 645-0411

Designer: City of Columbus

### **The following will be resurfaced this year in Project 4:**

Broadview Road, between Cherry Bottom Road and Chilmark Drive
